PROFILE

Full-Stack Developer with hands-on experience building and shipping production web and mobile applications, from database design and backend APIs to responsive front-end interfaces. Experienced in owning complete systems end to end, deploying serverless apps on Cloudflare Workers, managing relational databases, and building secure licensing and payment flows.

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Freelance / Projects) 2025 – Present
Baghdad, Iraq

- Designed, built, and deployed full-stack web and mobile applications used by real customers in Iraq.
- Built RESTful APIs and backend services, and designed relational database schemas for scalability and data integrity.
- Delivered responsive front-end interfaces and published mobile apps on both Google Play and the Apple App Store.
- Deployed and maintained serverless applications on Cloudflare Workers, including environment and secrets management.

Backend Intern, GDG 05/2025 – 08/2025
Baghdad, Iraq

- Collaborated with designers to refine layouts and interactions.
- Contributed to features like user profiles and ensured consistent styling with reusable components.
- Gained experience in debugging, Git, and structured full-stack workflows.
- Analyzed problems and worked with teams to develop solutions under strict deadlines.

PROJECTS

TabibiQ – Medical Appointment Booking Platform (Android & iOS) Full-Stack Developer
https://play.google.com/store/apps/details?id=com.tabibiq.app https://apps.apple.com/iq/app/tabibiq/id6807596163

- Built both the frontend and the backend, and owned the full system architecture and workflow end to end.
- Patients search doctors and clinics by specialty and location, book appointments directly, and receive confirmations and reminders.
- Doctors and clinics manage daily appointments and track patient schedules to reduce waiting times.
- Published and maintained on both Google Play and the Apple App Store.

Teryaq – Point of Sale (POS) System Full-Stack Developer

- Built a Flutter POS application with a complete software licensing system.
- Implemented cryptographic license verification (Ed25519 signatures) to prevent license forgery, with deep-link activation and an offline grace period.
- Integrated online payments through the Wayl payment gateway with signed webhook verification, connected to a Next.js billing website on Cloudflare Workers and a PostgreSQL (Neon) database.

Hala Teacher – Educational Website Front-End Developer
https://www.halateacher.workers.dev/

- Built the complete front end for an English teacher's website (6th preparatory grade): course plans, downloadable study booklets, practice questions, and ministerial exam resources.
- Responsive Arabic (RTL) design, deployed on Cloudflare Workers.

GameWiseIQ Backend Developer
https://gamewiseiq.com

- Architected and built the entire backend infrastructure, ensuring high availability, seamless data processing, and secure API integrations to support thousands of active users.

TECHNOLOGIES

- **Backend:** Node.js, RESTful APIs, webhooks, authentication & secure API integrations
- **Frontend:** HTML, CSS, JavaScript, Next.js, responsive & RTL design
- **Mobile:** Flutter (Android & iOS), app store publishing
- **Databases:** PostgreSQL (Neon), SQL, schema design, data modeling, database management
- **Security:** Ed25519 digital signatures, license verification, webhook signature validation
- **Cloud & DevOps:** Cloudflare Workers, serverless deployment, environment & secrets management, CI with GitHub
- **Tools:** Git & GitHub, Microsoft Office, Data Entry

SKILLS

- Collaboration
- Problem-Solving & Research
- Adaptability
- Communication & Public Speaking
- Attention to Detail
- Working Under Pressure

EDUCATION

Computer Engineering Technology,
Middle Technical University.
2023 – 2027
